Juan Jiménez Serrano

Computer Engineer & Senior Technician in 3D Animation

jujise96@gmail.com | linkedin.com/in/jujise96 | github.com/jujise96 | jujise96.github.io

PROFESSIONAL PROFILE

Graduated in Computer Engineering and Higher Technician in 3D Animation, Games and Interactive Environments. Specialized in Backend development (.NET, C#, SQL Server, Azure) and interactive 2D/3D environments in Unity. Solid technical base applied to the development of academic and personal projects, with mastery in hybrid software architectures (ORM/micro-ORM), integration of transactional APIs and agile methodologies (SCRUM). Great capacity for adaptation, teamwork and incident resolution strengthened through software development and experiences in customer service and logistics.

ACADEMIC BACKGROUND

Bachelor's Degree in Computer Engineering *2019 – 2026*
ETSI, University of Huelva

FPGS 3D Animations, Games and Interactive Environments *2017 – 2019*
IES Ángel de Saavedra

Scientific-Technological Baccalaureate *2016 – 2017*
IES Manuel De Falla

FEATURED PROJECTS

TFG - Plataforma Web Full-Stack (.NET & Cloud) *04/2025 – 06/2025*
Tecnologías: *C#, ASP.NET Core MVC, EF Core, Dapper, SQL Server, Azure Blob Storage, SendGrid API.*

- Comprehensive development of an interactive web application of mission and object guides under agile SCRUM methodology.
- Implementation of hybrid persistence architecture: Entity Framework Core for write/transaction operations and micro-ORM Dapper for high-performance, optimized SELECT queries.
- Integration of cloud services (Azure Blob Storage), authentication with Google and transactional mail service with SendGrid API.

Zombie Assault 3D - Survival Game (Unity / C#) *04/2024 – 07/2024*
Technologies: *Unity 3D, C#, NavMesh Surface, Genetic Algorithms.*

- Full FPS controller programming with weapon switching, shooting mechanics, animations, and dynamic HUD.
- Development of enemy AI with route tracing using NavMesh Surface and a proprietary genetic algorithm for the progressive adaptation of attributes (health/speed) according to the round.

Slug Warrior 2D - Arcade Action (Unity / C#) *02/2024 – 04/2024*
Technologies: *Unity 2D, C#, FSM (Finite State Machine), Pathfinding A*.*

- Implementation of combat logic and boss behavior using Finite State Machine (FSM).
- AI programming for flying enemies with obstacle avoidance and A* navigation.

DDSI - Gym Management System (Java / ORM) *10/2023 – 01/2024*
Tecnologías: *Java, Java Swing, Hibernate ORM, Oracle SQL, MySQL.*

- Desktop application development based on the MVC architectural pattern and relational persistence integration with Hibernate.

TECHNICAL SKILLS

Programming languages: C#, Java, C, C++, JavaScript, HTML5, CSS3

Backend & Cloud: .NET / ASP.NET Core MVC, Entity Framework Core, Dapper, Microsoft Azure, Google Cloud, Hibernate

Bases de datos: SQL Server, Oracle SQL, MySQL, PostgreSQL

Herramientas & Frontend: Git, GitHub, Bootstrap 5, REST APIs

3D & Game Development: Unity (2D/3D), Blender, Ultimaker Cura (3D Printing), Photoshop, After Effects

WORK EXPERIENCE

3D Modeler | CREATEC 3D *05/2019 – 07/2019*

- Custom design and modelling of three-dimensional parts and prototypes aimed at additive manufacturing using Blender and Ultimaker Cura.

Parcel Delivery Man (Campaigns/Seasons) | FAJUTRAN *2016 – Present*

- Reinforcement of delivery routes during the holiday periods with the highest volume of shipments (Christmas, Easter and Summer), combining it with studies from 2016 to the present.

LANGUAGES

Languages: Spanish (Native), English B2 (Upper-Intermediate)

ABILITIES

Teamwork, decisive, hardworking, sociable, resolution of complaints and conflicts, service orientation, cordial and professional treatment, geographical mobility, driving licence B.
